

MPL Auction Money Flow

How the purse, base price and bids work from the moment a player comes under the hammer to the moment the money leaves a team's account.

All prices in lakhs (L)
100 L = 1 Cr
Figures: Season 4 record

TEAM PURSE 200 L = 2 Cr per franchise, for the whole auction	BASE PRICE 10 L Same for every player. Bidding opens here	SQUAD SIZE 11 max Minimum 7. A full squad cannot bid	BID STEPS +1 / +2 L +1 L below 40 L, +2 L from 40 L up
--	--	--	--

01 The flow, player by player

Every player in the pool goes through the same seven beats. The money only moves at beat six.

1 Comes up Next player in the auction order appears on the console.	2 Opening bid = base price, 10 L. Nobody has bid yet.	3 First bid A team bids 10 L and becomes the leader.	4 Counter-bids Each new team adds one step: 11, 12, 13 ... 40, 42, 44 ...	5 Hammer Bidding stops. Operator calls Sold or Unsold.	6 Purse debited Final bid leaves the winning team's purse. Squad +1.	7 Next player Repeat until the pool is empty or the auction is ended.
---	---	--	---	--	--	---

🔄 Beats 3–4 repeat as long as teams keep bidding. A team's **Next bid** is always shown on the console before they tap.

02 How the price climbs

Bids move in fixed steps — nobody types an amount. Below 40 L each bid adds 1 L; at 40 L and above each bid adds 2 L.

10 open	11	12	13	14	15	...	37	38	39	40	42	44	46	48	...	80	82	84
---------	----	----	----	----	----	-----	----	----	----	----	----	----	----	----	-----	----	----	----

CURRENT BID	NEXT BID ADDS	EXAMPLE
Nobody has bid	opens at base	→ 10
10 L to 39 L	+1 L	27 → 28
40 L and above	+2 L	40 → 42 → 44

Why it matters: reaching 40 L takes 30 bids from base; every bid after that costs 2 L. In Season 4, 9 of 44 auctioned players crossed 40 L, and the top price was 84 L — 22 bids past the 40 mark.

03 Three ways a player leaves the block

■ Sold

Goes to the leading team at the current bid. Purse, squad count and the player's team update together — all or nothing.

■ Unsold

No team bid. Nothing is deducted. The player stays registered without a team and can be brought back in a later round or season.

■ Retained

Kept by the team before the auction; never comes under the hammer. Counts toward the 11-player squad. Season 4 had 16 retained players.

04 One team's purse, start to finish

A worked example with the Season 4 settings: 200 L purse, 10 L base, 11-player squad with 2 retained. Watch the purse column.

#	PLAYER	HOW	BIDS	PRICE	PURSE LEFT	SQUAD
1	Captain	Retained	—	0	200	1 / 11
2	Vice-captain	Retained	—	0	200	2 / 11
3	Marquee all-rounder	Sold after a 4-team fight past 40	34	46	154	3 / 11
4	Opening batter	Sold at base — no counter-bid	1	10	144	4 / 11
5	Wicket-keeper	Sold	18	27	117	5 / 11
6	Fast bowler	Sold	12	21	96	6 / 11
7	Spinner	Sold — minimum squad of 7 reached	8	17	79	7 / 11
8	Middle-order batter	Sold	21	30	49	8 / 11
9	All-rounder	Sold	13	22	27	9 / 11
10	Bowler	Sold	3	12	15	10 / 11
11	Batter	Sold — squad full, team card greys out	2	11	4	11 / 11
Spent on 9 auctioned players				196	4 left	11 / 11

Reading the Bids column: the count of taps it took to reach that price. Player 3 went 10 → 39 (30 taps at +1) then 40, 42, 44, 46 (4 taps at +2) = 34 bids across the competing teams.

Owner's rule of thumb (not enforced by the system): keep base price × slots still needed to reach 7 in reserve. At row 5 this team had 117 L and needed 2 more players, so 20 L was untouchable and its real ceiling on the next player was 97 L.

05 When a team cannot bid

The server checks every bid. On the console the team's card greys out and shows the reason — there is no way to overspend by mistake.

SITUATION	WHAT THE CONSOLE SHOWS	WHAT IT MEANS
Next bid is more than the purse left	Not enough purse	With 15 L left a team cannot bid 16 L. It can still bid on a cheaper player.
Squad already at 11	Squad full	Purse left is irrelevant — the team is out of the auction.
Team already holds the high bid	Leading	You cannot bid against yourself. Wait for another team to counter.
Team marked Inactive by the admin	Not active	The franchise is not part of this auction.
Auction paused or not started	All team cards disabled	Bidding reopens when the operator resumes.

06 Season 4 in numbers

The last completed auction, from the league record. Six franchises, 60 squad places, 44 filled by bidding.

1,096_L

total spent by 6 teams (≈ 10.96 Cr of 12 Cr available)

24.9_L

average price of an auctioned player

84_L

top price — Raj Keshkar, then 82 L, 78 L, 78 L

10 of 44

players went at base price, 10 L

16

players retained without going to auction

0_L

Alpha Legacy Legends' purse at the end — spent all 200

FRANCHISE	SPENT	PURSE LEFT
Alpha Legacy Legends (ALL)	200	0
Storm Breakers (SB)	199	1
Viking Raiders (VR)	193	7
Game Changers (GC)	189	11
Knight Hunters (KH)	179	21
Royal Vikings (RV)	136	64

Purse, base price, squad limits, bid timer and increment tiers are set per auction in the admin panel (Auctions → New auction; Teams → purse and squad limits) and can differ from the Season 4 values shown here. Season 4 figures are taken from the league's seeded auction record. Sales are recorded in a single transaction: the player, the purse debit and the squad entry are written together or not at all.
